**ADDED PAGE  
FOR LETTER ACCOMPANYING AMENDMENT AFTER ALLOWANCE**

Subject to the approval of the Examiner in this case, please amend Figure 4 of the Drawings as shown on the attached.

The amendment to Figure 4 is necessary in order to conform the Drawings to the Specification in this case. The specification at page 13 of the published application describes the arcuate electrode 62 as follows:

an arcuate electrode 62 having formed in its curved surface 64 a complimentary groove 66, the cross-section of which is similar to the triangular section of the workpiece shown in Figure 1. . .

As presently shown on the drawings, groove 66 is rectangular in cross-section, not triangular.

Included herewith is a substitute Drawing sheet showing groove 66 with a triangular cross-section.

No other changes are made to the Drawings.

It is believed that this amendment is needed for proper disclosure of the invention, and should require no substantial amount of additional work on the part of the Patent Office.
